

Would You Like Sciatica to Be a Pain in the Butt No More?

East Windsor, NJ ([I-Newswire](#)) July 26, 2013 - If you suffer from the pain and discomfort of sciatica, you will want to visit the latest website offered by Opportunity Visions, <http://www.symptomsofsciatica.net>.

Symptomsofsciatica.net is the latest in a series of sites from the niche website company, which is devoted to bringing easily digestible, usable information to the general public. "Sciatica is a very common and very uncomfortable condition, so we offer a wide range of informational articles to help our visitors learn what they can do to help themselves," said Sam Bayer, the company's co-founder. "We provide people with the most accurate and up-to-date information possible on our sites, no matter what the topic."

Topics on the new website cover a broad range of sciatica-related information, from its various causes, symptoms, and diagnosis, to both traditional and alternative treatments. In keeping with its mission to provide only accurate, authoritative content, the Opportunity Visions site uses only experts and opinion leaders to develop its content. It also provides research results and white papers where applicable. The articles, designed for the general public, are easy to read and free to download.

Opportunity Visions represents a new sort of direction for Internet education. According to Bayer, "There is a void on the Internet, where many so-called 'authority sites' fail to provide comprehensive or accurately detailed information for the average consumer. In contrast, we use only expert writers to ensure our content is as accurate and as relevant as possible for our visitors." Many of the articles were written by co-founder, Miriam Ruff, a professional writer and editor who is herself a sciatica sufferer. "I have used my extensive experience seeking relief from my sciatica to flesh out all the articles," said Ruff. "I don't want others to have to suffer the way I did."

Opportunity Visions offers informational websites in a variety of fields, including TMJ Dysfunction, Parrots, Disaster Preparedness and Speed-reading software.

For more information on Opportunity Visions and its extensive resources, contact Bayer at 609-301-5135, or either Bayer or Ruff at pressOV@gmail.com. To learn more about sciatica and how you can manage the condition, and to see Opportunity Visions' work firsthand, visit <http://www.symptomsofsciatica.net>.
